

## EGPiS Project is starting!!!

Like you know Egpis Project co-financing by Erasmus + is a project move from Encouraging Girl Participation in Sport.

We start from a study that gender equality is one of the fundamental principles of the European Union and has been "recognised as a basic principle of democracy and respect for humankind".

Latest studies reveal that sport participation among European children and adolescents is far from being consistent. Even though, according to the Special Eurobarometer 412 "Sport and Physical Activity" (European Commission & TNS Opinion and social: 2013) a "majority of 15-24 year-olds (64%) exercise or play sport at least once a week", physical activity tends to drop off between the ages of 11 to 15 in most European countries and the difference between genders is strongest in this age group: 74 % of boys and young men exercise on a regular basis, whereas the participation among girls and young women in the same age group only amounts to 55 %.

According to a WHO report on this specific theme ("Girls' participation in physical activities and sports: benefits patterns, influences and ways forward", 2004), girls' participation is determined by various personal (e. g. age, fitness level, motivation, perceived barriers) and environmental factors (e.g. peer group, family, culture, access, type of activity, school):

Only if such barriers will be overcome, girls will have equal opportunities and access to sports tailored to their needs. EGPiS project offers a horizontal solution by promoting a closer collaboration between schools and sports organisations.

We are READY and you???

## Partners
